USE AGREEMENT FOR OFFSITE SAMPLING - MG-069-92

Dear Frederick

As discussed in our telephone conversation, I am requesting access to your property on behalf of the Department of Energy/Rocky Flats Office (DOE/RFO) to obtain a small soil sample to support an environmental study that is currently being conducted. A soil sample from your property would help support this investigation by DOE in conjunction with the Environmental Protection Agency (EPA) and the Colorado Department of Health (CDH). This environmental study has been developed over the past year by DOE, EG&G, EPA and CDH with input from Jefferson and Boulder Counties and local cities representatives.

This letter is a request for access with enclosures that describes general information on the sampling activities, a map showing the proposed sampling location, and a Use Agreement for signature. After reviewing this Use Agreement, modifications can be made to address specific concerns. If the Use Agreement is to your satisfaction, please sign and return both duplicate originals to me. Following signatures from DOE and EG&G officials, I will return one copy for your files.

If you should have further questions, please feel free to call me at 966-8557

Sincerely,

M. Guillaume, OU 3 Manager

OU 3 RFI/RI SAMPLING ACTIVITY DESCRIPTIONS -PATTRIDGE LEYDEN INC

Operable Unit 3 (OU 3) is defined as the area offsite from the Rocky Flats Plant. The planned OU 3 sampling activities are detailed in a Work Plan that outlines the purpose, objectives, rationale and methods used to evaluate the presence or absence of contamination within OU 3. The Work Plan is based on the requirements of the Interagency Agreement (IAG) between the Department of Energy (DOE), the Environmental Protection Agency (EPA) and the State of Colorado Department of Health (CDH). This Work Plan is publicly available and information concerning the location of an available copy can be found by calling EG&G Community Relations at 966-2986.

OU 3 sampling activities began in April, 1992 and are scheduled for completion by spring of 1993. A Final Report which details the results and conclusions from this study is scheduled for completion in January, 1994.

The map, attached to this correspondence, shows the location of sampling activity. The sample location will be surveyed prior to the sampling event. Field adjustments could be made at the time of sampling to adjust specific sampling locations.

Sampling activities will not adversely effect your property. OU 3 sampling activities on this property involve collection of surface soil sample. The collection of surface soil samples involves removing one quarter to one half inch of surface soil from a 3 X 3 inch square in 25 locations within a ten acre plot. The approximate ten acre plot location is shown on the Exhibit A map.

EXHIBIT B**OU 3 RI/RI SAMPLING ACTIVITY DESCRIPTIONS -PATTRIDGE LEYDEN INC.**

Operable Unit 3 (OU 3) is defined as the area offsite from the Rocky Flats Plant. The planned OU 3 sampling activities are detailed in a Work Plan that outlines the purpose, objectives, rationale and methods used to evaluate the presence or absence of contamination within OU 3. The Work Plan is based on the requirements of the Interagency Agreement (IAG) between the Department of Energy (DOE), the Environmental Protection Agency (EPA) and the State of Colorado Department of Health (CDH). This Work Plan is publicly available and information concerning the location of an available copy can be found by calling EG&G Community Relations at 966-2986.

OU 3 sampling activities began in April, 1992 and are scheduled for completion by spring of 1993. A Final Report which details the results and conclusions from this study is scheduled for completion in January, 1994. ~~The Interagency Agreement period is extended for one year to cover any follow-up activities that may be required.~~ ✓

The map, attached to this correspondence, shows the location of sampling activity. The sample location will be surveyed prior to the sampling event. Field adjustments could be made at the time of sampling to adjust specific sampling locations.

Sampling activities will not adversely effect your property. OU 3 sampling activities on this property involve collection of surface soil sample. The collection of surface soil samples involves removing one quarter to one half inch of surface soil from a 3 X 3 inch square in 25 locations within a ten acre plot. The approximate ten acre plot location is shown on the Exhibit A map.
